

# Reglo Swingarm system

## Effex

### High vacuum

**THE REGLO SWINGARM SYSTEM** will enable you to design the perfect extractor arm for all application. You decide yourself the length of the horizontal suspension arm, as well as the parallelogram arm. You can choose between different hose diameters and types of hoods. The system also includes different reductions from the spirotubes to hoses.

### FEATURES

Due to the parallel arms there are no shaky friction joints, and no need for counterweights or telescopic tubes. The hood is easy to move but still retains a perfect positional setting.

The Reglo swingarms are easy to install in new extraction systems as well as in existing ones.

# Swing arm

## Swing arm "build-up" System
