

Mobi-Flex[®] mobile extractor

Effex

Low vacuum

- Profitable investment

DUST AND GASES

Mobi-Flex[®] is a mobile extractor with “no maintenance” replacement cartridge filters for mechanical cleaning of welding fumes and light grinding dust. The perfect solution for removing welding smoke and light dust.

Replacable cartridge: The machine has the capacity to handle large amounts of dust, which is filtered in a two-stage process. The filters do not need to be washed, but when full are simply removed and a replacement filter inserted in a couple of minutes.

Flexible: Mobi-Flex[®] is robust with wheels and handles for effortless transportation. Add the Flexi[®] extraction arm (see separate data sheet), and you have a versatile and flexible filtration unit that can be moved between different work stations.

Profitable investment: Reglo extractors reduce the amount of dust in the air. Less dust will mean less wear on the machinery, less cleaning in the workshop and the office, better lightning (no dirty lamps), clean material handling (washing baths in the paintshop will last longer), higher working speed and less sickness absence.

Mobi-Flex[®] cartridge filter
