

V-Max centrifugal fan

Effex

CENTRAL FAN

LOWVACUUM

Smoke, gas and lighter dust

The V-Max central fans are designed specially for smoke, gas and lighter dust.

Solid fans for floor, wall & ceiling mounting

Our fans are made of heavy steel plates and come complete with stands for mounting on floors, walls or ceilings.

Energy savings for welding operations

An extraction system with a central fan unit can be equipped with a frequency converter and a pressure sensor to save energy in the given workshop. The setup will automatically regulate the amount of air the fan extracts, according to the number of users who are using their fume extraction.

The amount of extracted hot air can be reduced considerably. A substantial saving!

V-Max central fans - 3000 & 4600 m³/h

Central Fan V-Max 3000 1.1kW / 3-phase with support for floor/wall/ceiling mounting.
Central Fan V-Max 4600 2.2kW / 3-phase with support for floor/wall/ceiling mounting.
